

Vehicle Trauma Kit

inspired by the field... for the field

The Humanitrain Vehicle Trauma Kit's features:

- ▷ Straps safely & securely onto rear of driver's seat (of any vehicle), allowing treatment while the vehicle is still moving
- ▷ Contents are appropriate for basic immediate care in the event of a road traffic accident or to treat conflict injuries such as gun-shot wounds, stabbing, blasts & other penetrating or blunt force trauma
- ▷ The kit includes a state of the art chest seal, tourniquet, trauma care bandages, shears, haemostatic agent, burn gel gauze, cling-film for burns and blasts, a SAM splint, slings, gauze, crepe bandages, face shield, heavy duty gloves, zinc oxide tape, paper stitches, anti-septic wipes, plasters
- ▷ Contains safety materials such as high visibility vests, gloves, face-shields, lights & high visibility strips on the exterior of the kit
- ▷ Unclips easily & rapidly to become a ruck sack/grab bag for rapid evacuation or routine work outside the vehicle
- ▷ Basic instructions printed on cover in plain view of passengers for active and passive instruction
- ▷ Clear plastic pockets enable the responder to see all the items in compartments in the order in which they will be used
- ▷ Lightweight with additional strap at front of ruck sack to ensure it can be carried at speed for long distances without chaffing
- ▷ Rubber bottom to prevent conduction & keep the kit dry
- ▷ Kit is manufactured in the UK from anti-fungal and antimicrobial material so it won't rot even in extreme conditions
- ▷ The Humanitrain Vehicle Trauma Kit has sufficient quantities of the right type of trauma materials for field work in both urban and rural contexts, to treat conflict related injuries as well as road traffic accidents

Price of the Humanitrain Trauma Kit £350
